Professional Associate:

Are you interested in continuing the improvement of your career?

If so, you should become familiar with the Executive Search Division of The Webster Computer Corporation. The Webster Computer Corporation is engaged in the computer business in such diverse areas as consulting, computer leaseback, executive search and programming services.

Our search and placement methods are different from most search firms because we are computer professionals who understand your interests and motivations. We find that a man of talent is seldom satisfied with a job per se. Interesting challenging assignments, the opportunity to expand his knowledge base and increasing responsibilities are mandatory.

If you have the talent to handle such assignments we can provide the top level contacts who are interested in meeting with you. We are extremely selective, and seek to save our clients the time and embarrassment of meeting the non-qualified. We invite qualified candidates to telephone our offices collect, and forward a resume of achievements with appropriate references. All of our fees are paid by client companies.

We shall expect to hear from you regarding your interest in career improvement.

Cordially,

Henry Mara
